

# Paul John Butad

## Full-stack Developer

I've spent the past 3 years solving people's problems through technology and design. These days, aside from my day-to-day job, my time is spent on mentoring others in our small community

- Update and fix bugs on the core libraries of the project.

Contact : Jane Camille Losa

### Full-stack Developer (Freelance project) Game-Antena

12/2021 - 06/2022

Game-Antena is an online platform where users can browse **top games** and **streams** from popular platforms like Twitch & Youtube

Achievements/Tasks

- Start from Game-Antena's [initial website](#) and improve every aspects of it (UI/UX, functionality, accessibility, responsiveness, etc.).
- Setup and use Docker on the backend to speed up development workflow.
- Integrate big streaming platforms' (Twitch & Youtube) API services to the application.
- Develop a full-stack application using ReactJS + NodeJS.

Contact : Andrae Torres - 1-407-990-9354

## PERSONAL PROJECTS

### Modern Web Dev (05/2022 - Present)

- Develop a boilerplate for developing multi-page applications in a modern way (with webpack).
- Create small separate packages to be used; [modern-web-dev-utils](#) and [modern-web-dev-scripts](#).
- Test the utility functions to be used in webpack configuration to make sure everything is working as expected: [Screenshot of test result](#).

### Bracketour (10/2021 - 10/2021)

- Develop a tournament bracket generator app with Vanilla JS.
- Technologies used: JavaScript (ES6+), Jest (testing).

### React - Todo App (10/2021 - 10/2021)

- Develop a React version of [dom-practice-todo-app](#) (which is built with Vanilla JS).
- Technologies used: React, Jest & Enzyme (testing), Redux (with toolkit & without toolkit).

## EDUCATION

### Information and Communication Technology (ICT) AMA Computer College East Rizal

07/2018 - 04/2020

Antipolo, Philippines
